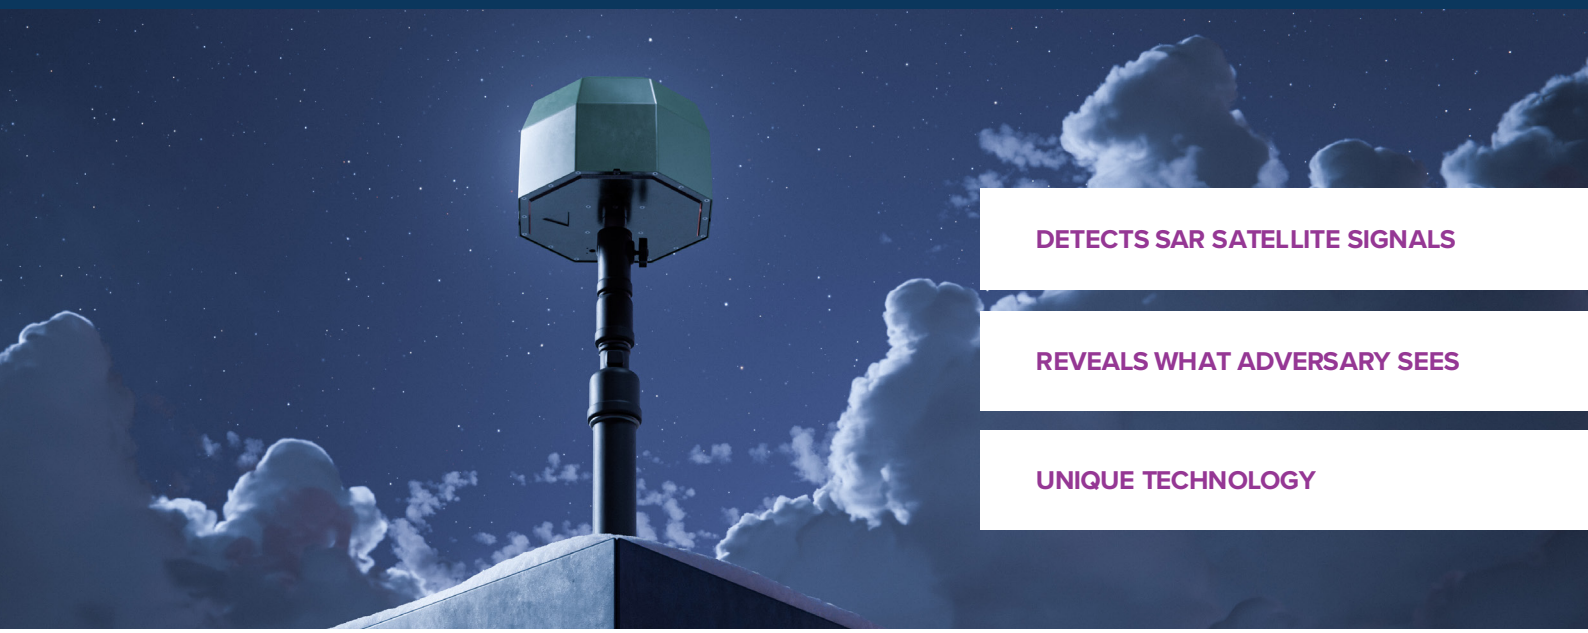
Defence & Aerospace

DAREYE

See what adversary SAR satellites are doing.
Transform observations into actionable intelligence.



DETECTS SAR SATELLITE SIGNALS

REVEALS WHAT ADVERSARY SEES

UNIQUE TECHNOLOGY

DAREYE can be used in many ways.

Fixed
Monitoring mode for training grounds.

Mobile
Battle group surveillance on tripods or vehicles.

Measuring adversary SAR capabilities, estimating the threat and planning countermeasures with a passive device, designed for deployment from arctic to desert.

Patent pending.

Nordic technology

DAREYE, designed and manufactured in Finland, represents bold Nordic thinking, where ingenuity meets the most demanding conditions.

KEY BENEFITS

DAREYE

- Helps you protect your critical assets.
- Detects whether your asset was tracked or searched for.
- Warns when surprise element is compromised.
- Improved situational awareness.

Beyond the Ordinary

DA-Group delivers reliable electronics and high-tech solutions for industrial, defence and aerospace applications worldwide.

Trusted Partner in Space Solutions

DA-Group has strong expertise in space technology and over a quarter century of experience in critical space projects. We provide interference-resistant positioning and situational awareness solutions for civil and security applications. Our design and manufacturing processes meet the highest quality and industry standards.
